

Nigeria Verified Rental Infrastructure

Project Blueprint – Long-Term Infrastructure Vision

1. Vision & Positioning

This platform is not a listing website. It is Nigeria's Verified Rental Infrastructure.

Our mission is to build the trust layer that connects Landlords, Agents, and Tenants through structured accountability.

Core Philosophy: Trust over Volume. Structure over Noise. Authority over Popularity.

2. Launch Strategy

Phase 1 Geographic Focus: Lagos (Lekki, Ajah, Yaba, Ikeja, Surulere, Victoria Island).

Private beta onboarding of 20 landlords, 30 agents, and 100 tenants.

Manual verification before controlled public launch.

3. Core Roles

Landlord (Property Owner) – Mandatory internal verification, optional public identity.

Agent (Realtor) – Mandatory identity verification before listing.

Tenant (Renter) – Basic signup verification, full verification before application.

4. Core System Layers

Layer 1: Identity & Role Layer – Verified users with reputation tracking.

Layer 2: Property Ownership Graph – Property linked to verified owner and authorized agents.

Layer 3: Activity Tracking Layer – Viewing logs, applications, agreements.

Layer 4: Reputation Engine – Behavioral tracking and scoring.

5. Mandatory Policies

No unverified public listings allowed.

Mandatory agent verification before listing.

Mandatory landlord internal verification before property approval.

Inspection fee regulation by area and property class.

6. Inspection Fee Regulation Engine

Platform sets fee ranges per area (e.g., Lekki: ₦5,000–₦10,000).

Agent must select fee within allowed range.

System logs inspections and monitors abuse patterns.

Violation leads to warnings, suspension, or badge removal.

7. MVP Feature Set (Version 1)

Role-based authentication system.

Property listing with ownership authorization.

Search & filter optimized for Nigerian rental categories.

Viewing booking system.

In-app chat.

Reputation markers.

Admin dashboard for verification oversight.

8. Technology Stack

Backend: Supabase (Postgres + Auth + Storage).

Frontend Web: Next.js (App Router).

Mobile App: React Native (Expo).

Infrastructure: Vercel + Cloudflare.

Security: Row-Level Security policies and event logging.

9. Long-Term Expansion Vision

Escrow & secure rent payments.

Digital agreements and contract tracking.

Tenant screening and credit profiling.

Maintenance & service marketplace.

Insurance and rent financing integration.

10. Brand Philosophy

Tone: Clean Minimal Premium.

Visual Direction: Deep Navy / Charcoal, subtle accent tones.

Emotional Positioning: Control, Safety, Authority.
